TOOLS NEEDED

2.1

Starting at the top edge of the windscreen as shown, measure along the centre line of the ditch towards the rear of the vehicle. Mark the ditch molding at the following points as shown in fig 2.1.

Using a flat screw driver and starting from the front of the vehicle, lift and remove the two ditch moldings running along either side of the roof.

Using a pair of snips, cut the ditch moulding on each of the marks you made and clip the remaining moldings back into the ditch according to the distances shown.

2.2

Mark the location of each hole, using the same method as in 2.1, at the distances shown in fig 2.2.

Verify that the markings line up with the slots of the Bottom Spacers (Item 6), by placing the spacer in the ditch, before drilling the mounting holes.

Before drilling, remove bottom spacer. Drill a 6.5mm pilot hole in the center of each mark. Open the holes using a 12mm Drill.

2.3

Insert the M6 Button Head Bolt (Item 15) into the one side of the Jack Nut Tool (Item 14). Loosely fit a Jack Nut (Item 13) to the Button Head Bolt as shown. Using the Jack Nut Tool and a M6 x 30 Button Head Bolt, insert the M6 Jack Nuts into all holes on both sides. Place the assembly into the hole drilled. Using a Battery Powered Screw Driver and a H4 Allen Key Bit, set the Jack Nut into the hole while holding onto the handle of the Jack Nut Tool.

Make sure the Jack Nut has pulled up all the way to the inside skin of the roof panel.

FIT AND SECURE

Secure the Front Stiffener Plate 02 (Item 2) to the front of the Foot Rail (Item 1) using M6 x 16 Button Head Flange Bolts and M6 Nyloc Nuts (Items 8 and 9).

Secure the Rear - and Mid Stiffener Plate 01 (Item 3) in the same manner as above.

Finish off by placing M6 Nut Caps (Item 10) on the M6 Nyloc Nuts.

Repeat on both sides.

Tightening Torque:

M6 : 8-10Nm / 5.9 ft lb - 7.38 ft lb

3.2

Assemble Standard Slats (Item 4) to the foot rail assemblies shown in 3.1, using M6 x 25 Thread Forming screws (Item 7) and leave off the front slat.

Use a little oil on the screw threads, note that these are Thread Forming Screws.

Take care when using a cordless driver.

Do you fit the front slat yet.

Tightening Torque:

M6 : 8-10Nm / 5.9 ft lb - 7.38 ft lb
